“The goal is to transform data into information, and information into insight”

Carly Fiorina

2010 Wyoming Victim Services WyoSAFE Data

The 2010 WyoSAFE Data provides a comparison of Wyoming Division of Victim Services (DVS) funded victim services programs throughout Wyoming. Programs were compared by type and population. The goal of this comparison is to demonstrate the importance of quality data and share some of the trends and inconsistencies found in the comparison data.

The WyoSAFE data is critical for state and federal funders to gain an understanding of the difference these programs have made to individuals served and the local community.

In addition, the WyoSAFE data:

- Documents the success and needs of victims of crime;
- Provides information to identify gaps in services;
- Provides critical information for policy and program planning;
- Facilitates the planning for improvements and sets benchmarks for the future;
- Initiates positive change!

Accurate data collection is essential to maintaining the integrity of the WyoSAFE data.

Consequences from improper data collection/data entry include:

- Inability to answer questions accurately;
- Inability to validate the data;
- Distorted findings waste resources;
- Does not provide an accurate picture of the victims served or the services provided;
- Compromises decisions for public policy.

Program Type

Domestic Violence/Sexual Assault Programs (DVSA) are non-profit programs which provide services and support to adult and adolescent women who are victims of domestic violence, sexual assault and stalking. These programs are staffed to provide services 24 hours/day, 7days/week. Men and children may also receive services under certain conditions.

Victim/Witness Programs (V/W) provide services to men, women and children who are victims of any crime. They are typically housed in law enforcement or prosecution offices.

Child Advocacy Centers (CAC) work within a multi-disciplinary team approach to serve child victims of physical, emotional, or sexual abuse. They provide necessary medical, emotional, legal, investigative and victim advocacy services in a child friendly environment to ensure children are not further victimized by the systems intended to protect them.

Court-Appointed Special Advocate Programs (CASA) provide a court-appointed voice for abused and neglected children by advocating for their best interests with the goal of obtaining a safe and permanent environment in which to grow and develop into a stable adult.

*Sexual Assault Nurse Examiner (SANE) Programs were not included in this comparison.

Population Categories

Population Categories	Wyoming County	2010 Census	Population Categories	Wyoming County	2010 Census
PC1 1-10,000	Platte	8,667	PC3	Albany	36,299
	Niobrara	2,484	20,001- 40,000	Sheridan	29,116
	Hot Springs	4,812		Park	28,205
	Johnson	8,569		Uinta	21,118
	Crook	7,083		Teton	21,294
	Washakie	8,533			
	Weston	7,208			
PC2 10,001 - 20,000	Carbon	15,885	PC4	Fremont	40,123
	Big Horn	11,668	40,001- & Up	Sweetwater	43,806
	Converse	13,833		Campbell	46,133
	Goshen	13,249		Natrona	75,450
	Lincoln	18,106		Laramie	91,738
	Sublette	10,247			

Findings of the 2010 Wyoming Victim Services WyoSAFE Data

In 2010 Wyoming Victim Service programs served 16,341 crime victims and provided 136,615 services.

Findings

The overuse and misuse of the "Other" categories.

- "Other" response does not provide the information about success and needs of crime victims.
- Other response often include in the notes field, "Other" Assault, "Other" Sexual Assault and "Other" Fraud.
- "Other" responses are excluded from state and federal report.

The overuse and misuse of "Units of Service."

- Each service should be counted each time a service is provided; a service should be entered each time there is contact with a client.

Overall the findings demonstrate that WyoSAFE users are not consistent in their data collection and data entry.

Recommendations

WyoSAFE users shall have procedures and policies for quality control that ensure data is being collected consistently and accurately.

WyoSAFE users shall utilize the data dictionary developed for WyoSAFE to ensure that all users of WyoSAFE are applying the same definitions and policies during data entry.

The data dictionary can help users decide what each question and category mean and helps them accurately enter the data in the correct category. The data dictionary will ensure the quality of data that is entered into WyoSafe by minimizing incomplete or inaccurate entries.

*“Errors using inadequate data
are much less than those
using no data at all”*

Charles Babbage
